GMS 5905: Informatics for Pathology Practice and Research I
Section 25G1 - Unix Operating Systems
Spring 2018 - 1 credit

Contact Information

Course Director
Srikar Chamala, Ph.D., Assistant Professor (Clinical Bioinformatics & Biomedical Informatics)
- Email: scchamala@ufl.edu
- Phone: 352.265.9900, ext. 72272
- Office Location: 4800 SW 35 Drive, Gainesville, FL 32608

Class & Office Hours
- Held from January 9, 2018 to February 12, 2018
- Class meetings:
  - Tuesday, 12:00 PM to 1:30 PM: Room – D6-10 (Dental tower in the dental bldg, 6th floor)
  - OR
  - Thursday, 12:00 PM to 1:30 PM: Room – CG-56 (Communicore on the ground floor)
- Office Hours: Mondays and Fridays from 12:00 PM to 1:00 PM via Zoom Web meeting

TA
Ashish Katiyar
- Email: ashish.katiyar@ufl.edu

Course Information

GMS 5905 Informatics for Pathology Practice and Research series - Overview
The GMS 5905 Informatics for Pathology Practice and Research (IPPR) series is a set of 3 1-credit hands-on courses that will give a good background and working knowledge in three major aspects of informatics. –The first course, Section 25G1, covers the Unix Operating System and is offered from 1/8/18-2/12/18. –The second course, Section 264E, covers Python Programming and is offered from 2/12/18 – 3/26/18. The last course in the series, Section 265A, covers Advanced Data Analysis & Visualization and is offered from 3/26/18 – 4/30/18. All of these courses will use training data sets and examples from clinical settings. The courses are not co-requisites, which allows for individual registration based on discrete needs. After finishing this series, students will be able to build computing tools for laboratory operational analytics and data visualization, as well as solve "big data" research problems, in both clinical and basic sciences.
Informatics for Pathology Practice and Research I - Section 25G1 - Unix Operating Systems

This course will cover all critical commands and tricks for working on Unix/Linux operating systems (OS). Graphical User Interface (GUI) operating systems like Mac OS or Windows are familiar to use but require human intervention. While command-line based OS gives ability to automate computing tasks, which help achieve tasks faster and less error prone. Furthermore, many big data (e.g., bioinformatics, health data) software tools are written to run on the command-line and often have no graphical interface. Having knowledge of working of command-line Unix environment gives a convenient way to execute the existing software and also efficiently perform data management.

- Week 1: Getting Started with Unix
- Week 2: File Management
- Week 3: File Management continued
- Week 4: Writing Bash Scripts
- Week 5: Submitting Jobs on high performance computing

Course Goals

Upon successful completion of the course, the student will be able to:
1. Navigate through Unix/Linux environments
2. Solve big data science problems by using high performance computing servers
3. Create programs, and interpret those written by others, in Unix
4. Make informed decisions on informatics server needs in a biomedical setting

Prerequisites and Requirements

- No prerequisites. I assume no knowledge of programming or computing.
- Need to bring a laptop to the class for doing assignments.
  - Laptop should be set up with UF Wi-Fi connection
  - Windows Users – PuTTY and WinSCP
- All the class material is provided (no textbooks required).
- Course is primarily being offered for Dept. of Pathology members; however, it could be open to clinicians/researchers from other disciplines with the permission from course director.

Course Offering Format

The class will be offered in flipped classroom format, where students will be go through most of the course materials online including videos and assigned readings prior to the class. During the class, students will apply the concepts they learned by practicing informatics exercises with the guidance of the instructor and peers. Attendees of this class includes full-time working professionals with busy schedules. To accommodate these diverse schedules the course is offered in two sections (one and half hours each), where same content would be taught in each of the sections. Attendees will be given the flexibility to attend any one (or even both) of the sections per week based on their needs and availability.
If you have difficulty accessing the course site or need other technical assistance contact the Help Desk at 352-392-HELP (4357) or helpdesk@ufl.edu.

Course Assignments - Point Distribution

There will be three types of course assignments due every week. See the below table for the point distribution. All of the assignments are non-proctored and are open book/internet. Assignments can be done by discussing with peers, however direct copy and paste of others work is not allowed.

- **Quizzes** – Every week there will be one quiz assignment, which will be due on Monday by 11:59 PM (with exception of first quiz) of the corresponding week. Material covered in the quizzes are from the material listed under "Before Class To Do List" section of that week. It is very important to complete "Before Class To Do List" before the class as it will not only impact the score on the quizzes but also your ability to perform in-class exercises. You will receive a second attempt to improve your score.

- **In-class Exercises** – An in-class exercises assignment will be due every week on Friday by 11:59 PM.

- **Peer Review** – Each of the submitted in-class exercises assignments will be assigned to two students in the class for peer review and is due every Monday by 11:59 PM. Example, a student submits in-class exercise assignments by Friday, of the first week, which will be assigned to two students who will have to peer review within three days and submit it by Monday 11:59 PM.

**Policies**

**Attendance and late work**

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at: [https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx](https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx). Late work will only be accepted with prior instructor approval.

**Disabilities**

“Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

**Campus Helping Resources**

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

- **University Counseling & Wellness Center**, 3190 Radio Road, 352-392-1575, [www.counseling.ufl.edu/cwc/](http://www.counseling.ufl.edu/cwc/)
  - Counseling Services
  - Groups and Workshops
  - Outreach and Consultation
  - Self-Help Library
  - Training Programs
  - Community Provider Database
- **Student Complaints**: [https://www.dso.ufl.edu/documents/UF_Complaints_policy.pdf](https://www.dso.ufl.edu/documents/UF_Complaints_policy.pdf)
Honor Policy

UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code (http://www.dso.ufl.edu/sccr/process/student-conduct-honorcode/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Online Course Evaluations

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.
